

STICKMAN ANIMATION DIRECTOR + ASSET-FIRST PRODUCTION BIBLE

Chapter 1 — redesigned specifically to prevent slideshow animation

Core correction: the agent must NOT interpret each timestamp as a still scene. The SRT supplies narration timing. The animation is a continuous timeline of scenes, shots, camera moves, character performances and prop interactions. A single 2-second subtitle can contain 3–5 camera/keyframe beats; a scene can continue across many subtitle lines; a background can transform or be revealed by a camera move rather than simply being replaced.

Production order is mandatory: ① asset generation → ② asset validation/locking → ③ scene graph → ④ camera blocking → ⑤ character/face/prop animation → ⑥ transitions → ⑦ comedy pass → ⑧ continuity pass → ⑨ render.

24 fps: 0.25 s = 6 frames, 0.5 s = 12 frames, 1 s = 24 frames. Use these frames for anticipation, impact, follow-through and reaction holds. Do not create a new illustration every 24/48 frames.

PHASE 1 — GENERATE ALL ASSETS FIRST

Paste this instruction to the agent before animation: “STOP. Do not animate yet. Build the canonical SVG asset library first. Every asset must have a stable ID and stable anchor points. Characters must be modular cutouts so the face, eyes, brows, mouth, head, torso, upper/lower limbs and hands can animate independently. Backgrounds must be separated into parallax layers. Props must have canonical scale and pivot points. Generate expression sheets and comedy poses. After the asset pass, validate that every recurring asset can be reused without redrawing it.”

CHARACTER + FACE ASSETS

ID	Generation specification
CHAR-M01	Male stickman master rig — separate head, torso, arms, hands, legs, shoes; neutral/walk/run/sit/crouch/fall poses.
CHAR-F01	Female stickman master rig — same construction, stroke and anchor system as M01.
FACE-M01	Male face layer sheet — neutral, suspicious, confused, smug, panic, deadpan, shock, side-eye, guilty, sad, excited, exhausted.
FACE-F01	Female face layer sheet — neutral, deadpan, annoyed, smug, confused, dramatic, horrified, skeptical, exhausted, surprised, side-eye.
HANDSET	Hand gesture library — point, wave, shrug, phone, cup, sign, facepalm, crossed arms.
POSESET	Comedy pose library — freeze, lean, recoil, duck, tiptoe, collapse, power-pose, mannequin, exaggerated walk.

BACKGROUND ASSETS

ID	Generation specification
BG-STUDIO	Neutral explainer stage with separate foreground/midground/background layers.
BG-HOLLYWOOD	Generic Hollywood/red-carpet street: carpet, ropes, press wall, distant crowd.
BG-CINEMA	Cinema with screen, seats and aisle; screen is a separate layer.
BG-90S	1990s fashion/editorial studio with photo lights and dressing area.
BG-Y2K	Y2K fashion showroom with mirror, rack and glossy floor.
BG-GYM	Generic gym with rack, treadmill, mirror wall and floor grid.
BG-CLINIC	Clean non-graphic medical explainer room with diagram screen.
BG-RETRO	Original retro low-poly game world + character creator screen.
BG-GOTHIC	Victorian/gothic drawing room/hallway with curtains, lamp and rose.
BG-TRIBUNAL	Internet tribunal/forensic room with bench, evidence screen and gavel.
BG-OFFICE	Generic office/startup desk, browser, chair and door.
BG-KITCHEN	Meal-prep kitchen with counter, fridge and table.
BG-AUDIENCE	Cinema audience with layered silhouettes and screen.
BG-END	Minimal end-card stage.

PROP ASSETS

ID	Generation specification
PROP-PHONE	Smartphone/social-feed UI
PROP-CAM	Paparazzi/news camera + flash
PROP-RED	Red carpet + rope + flash bulbs
PROP-SCREEN	Cinema/TV screen
PROP-PEND	Oversized beauty-standard pendulum
PROP-FOOD	Bread, cracker, kale, chicken, broccoli, cheese
PROP-MONEY	Money stack, price tag, coin
PROP-MED	Generic medicine/pharmacy visual + weekly-shot icon
PROP-BROWSER	Browser window/tabs
PROP-CLOCK	Alarm clock / 4 AM
PROP-GYM	Treadmill / squat rack
PROP-FACE	Abstract face-volume/cheek anatomy diagram
PROP-GAME	Character creator HUD
PROP-BAT	Giant battery icon
PROP-EMAIL	Business envelope
PROP-BELL	Gavel / tribunal bell
PROP-SCALE	Body-scale / measurement UI
PROP-WATER	Water glass
PROP-WALK	Walking-path icon
PROP-BOT	Generic smooth replica/cyborg mask
PROP-TEARS	Tear drop / frozen forehead gag
PROP-SUB	Subscribe button
PROP-CARB	Carbohydrate/food icons
PROP-BILLBOARD	Corporate billboard / body-positivity signage
PROP-LOOP	Feedback-loop / downward elevator graphic
PROP-SHIELD	Barrier / wall / gate
PROP-MIRROR	Mirror with camera lighting
PROP-MARVEL	Generic superhero training poster
PROP-SURGERY	Non-graphic stylized medical tray
PROP-DELI	Cartoon deli counter / meat slice
PROP-CONTRACT	Generic TV contract
PROP-QUESTION	Question-mark evidence cards
PROP-OUTSOURCE	Service stations: driver, cleaner, childcare, concierge
PROP-TRIAL	Morality/discipline/health cards
PROP-ROSE	Wilted rose / raven
PROP-GRID	Identical-face symmetry grid

PHASE 2 — CHARACTER PERFORMANCE SYSTEM

- **Never redraw the stickman per shot.** Use CHAR-M01/CHAR-F01 as rigs and animate transforms.
- **Face animation is continuous.** Eyes track props/camera; brows lead emotion; mouth changes slightly after body movement. A deadpan face can be funnier than a full expression.
- **Body anticipation:** 4–8 frames before a major action, lean/compress the body toward the action.
- **Impact:** 2–4 frames of squash, overshoot or recoil; then 6–12 frame reaction hold.
- **Walks are purposeful.** The character walks to a prop, gets interrupted, changes direction, or crosses camera—not endless looping.
- **Stickman is part of the gag.** Keep intentionally simple limbs while the world becomes absurdly elaborate. Do not 'upgrade' the stickman into a realistic human.
- **Look-at system:** head rotation 2–4 frames behind eye movement; eyes 1–2 frames ahead of head. This creates life without extra artwork.

PHASE 3 — CAMERA / EDITING SYSTEM

- **Continuous camera:** begin each beat from the previous beat's ending position. Do not reset to a default centered frame.
- **Micro-shot rhythm:** within a 2–3 s line use 3–5 keyframe beats: setup → movement → reveal/escalation → punchline → reaction.
- **Background changes are motivated.** Use camera pans through doorways, screen wipes, foreground occlusion, flash frames, whip-pans, match cuts and graphic wipes instead of simply swapping backgrounds.
- **Prop entrances:** 4–8 frame ease-in, optional 105–110% overshoot, then settle. Stagger entrances; never pop every object at once.
- **Parallax:** foreground moves faster than midground; background slower. Even simple stickman scenes should have depth.
- **Cut only when useful:** on a visual impact, word emphasis, object crossing lens, flash, head turn, whip-pan, screen change, or completed joke.
- **Reaction holds matter.** A 6–12 frame deadpan stare can be the punchline. Do not immediately cut away because the subtitle ended.

PHASE 4 — TIMESTAMPED CONTINUOUS DIRECTOR SHEET

Each SRT line below is a **timing region**, not a slide. The micro-shots inside it are consecutive animation/keyframe states. Preserve camera momentum and body motion across the boundaries.

SCENE/BEAT 001 | 00:00:00,000 → 00:00:02,000 | 2.00s

SRT: If you've looked at a red carpet, a movie screen, or your

LOCKED ASSETS: CHAR-M01 | BG-HOLLYWOOD + BG-CINEMA | PROP-RED, PROP-SCREEN, PROP-PHONE

MICRO-SHOT 1 [0.00s–0.50s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.50s–1.04s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** head tracks the moving screen **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.04s–1.56s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** foreground phone crosses lens **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [1.56s–2.00s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

SCENE/BEAT 010 | 00:00:29,925 → 00:00:32,405 | 2.48s

SRT: biological subscription to the concept of lunch.

LOCKED ASSETS: CHAR-M01 | BG-KITCHEN | PROP-CARB, PROP-FOOD

MICRO-SHOT 1 [0.00s–0.62s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.62s–1.29s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** character crosses foreground **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.29s–1.93s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** prop enters during movement **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [1.93s–2.48s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

SCENE/BEAT 011 | 00:00:32,967 → 00:00:36,647 | 3.68s

SRT: But why is everyone suddenly speedrunning the Tim Burton aesthetic

LOCKED ASSETS: CHAR-M01 | BG-RETRO | PROP-GAME

MICRO-SHOT 1 [0.00s–0.74s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.74s–1.55s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** cursor drags slider **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.55s–2.47s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** character morphs in place **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [2.47s–3.09s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** glitch/whip transition **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 5 [3.09s–3.68s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

LOCKED ASSETS: CHAR-M01 | BG-STUDIO | none

MICRO-SHOT 1 [0.00s–0.78s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.78s–1.62s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** character crosses foreground **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.62s–2.43s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** prop enters during movement **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [2.43s–3.12s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

LOCKED ASSETS: CHAR-M01 | BG-STUDIO | none

MICRO-SHOT 1 [0.00s–0.84s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.84s–1.75s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** character crosses foreground **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.75s–2.62s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** prop enters during movement **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [2.62s–3.36s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

MICRO-SHOT 1 [0.00s–0.80s]: Establish the active character already in motion. Give a tiny weight shift/eye dart; introduce the first visual idea without resetting the world. **CAMERA:** Continue from the previous shot's final camera position; 3–4 frame continuation before changing direction. **FACE:** Neutral attention → eyes identify the object/idea. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 2 [0.80s–1.66s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** tear travels **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 3 [1.66s–2.50s]: Continue the same performance. Add exactly one escalation: prop interaction, scale change, character crossing, background reveal, or unexpected reaction. Do not return to neutral. **CAMERA:** forehead remains frozen **FACE:** Eyes lead → head follows → brows/mouth follow. Keep the face alive while limbs continue moving. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

MICRO-SHOT 4 [2.50s–3.20s]: Complete the gag with a physical consequence. Use the simplest possible absurd action, then freeze the body while the eyes/face deliver the reaction. **CAMERA:** Punch-in/reveal/whip-pan settle or deliberate locked-off hold; never just cut to another still. **FACE:** Snap to deadpan/surprised/suspicious reaction 2–4 frames after the physical impact. **EDIT:** If continuing, match camera velocity and screen direction. If leaving the scene, motivate the cut with an object crossing frame, whip-pan, flash, screen wipe, reaction or visual match.

NO-SLIDESHOW CHECK: At least one of character, face, prop, background parallax or camera must be moving in every micro-shot. At least one beat must overlap into the next beat. Do not place a new static background underneath each subtitle.

PHASE 5 — FINAL AGENT CONTRACT

- Generate and lock assets before animation.
- Build scenes from the visual idea, not from arbitrary 2-second chunks.
- Treat SRT timestamps as narration boundaries; visual scenes may span multiple lines.
- Within every short beat, use multiple keyframe states rather than multiple still images.
- Animate camera independently from characters and props.
- Animate eyes, brows, mouth and head separately from body movement.
- Use parallax backgrounds and foreground occlusion to create continuous spatial movement.
- Use motivated transitions rather than default fades.
- Keep recurring SVG IDs identical throughout the chapter.
- Before final render, scrub the entire timeline with audio muted. Every line should still have a readable visual action, reaction or transition.
- Final visual target: **casual YouTube stickman comedy** — simple characters, clever staging, fast visual metaphors, awkward physical reactions, deadpan holds, sudden reveals, and a camera that behaves like a human editor following a performance.
